For the first time, there will be the Z101 in 2022: The 101km course will be run as a semi-autonomous race. Runners must study the GPX data or the map in advance and orientate themselves on the basis of this.

Each participant must provide proof of an ultra result (min. 80km) in the last two years. This must be submitted with the registration. After the organiser has checked the result, the registration will be confirmed and become effective. In addition, a salvage insurance through the Austrian Mountain Rescue Service must be taken out with the registration.

Refreshments will be provided by the runners themselves - there will only be refreshment points at selected huts. These will be communicated on the homepage.

For safety reasons, each runner is obliged to carry a GPS tracker provided by the organiser at all times and to be reachable via a mobile phone for the race management and the mountain rescue service.

Coaches are allowed to support the athletes on the entire course.

The compulsory equipment (6.1) will be checked before the start, a start is not possible if the equipment is missing.

On Thursday, 08.09. there will be a Runner's Briefing in the evening. This is obligatory for all runners. Participation is also possible virtually.

In case weather conditions would prevent using the original courses, substitution courses will be used, if possible.

If the Z101 is cancelled due to weather conditions, the athletes will be switched to the TUX070.
If the Z101 and the TUX070 are cancelled due to weather conditions, all starters will be switched to the RK50.

2.8. Course and time limit modifications

In case of bad weather, and for safety reasons, the organisers are entitled to stop the race, to adapt the courses and/or checkpoints and/or time limits. All such decisions will be issued by the Race Committee.

2.9. Marking

Signposting and course marking explanations will be sent to all runners shortly before the race and mentioned in the runners briefing.
