ACCURACY OF THE MEASUREMENT DATA

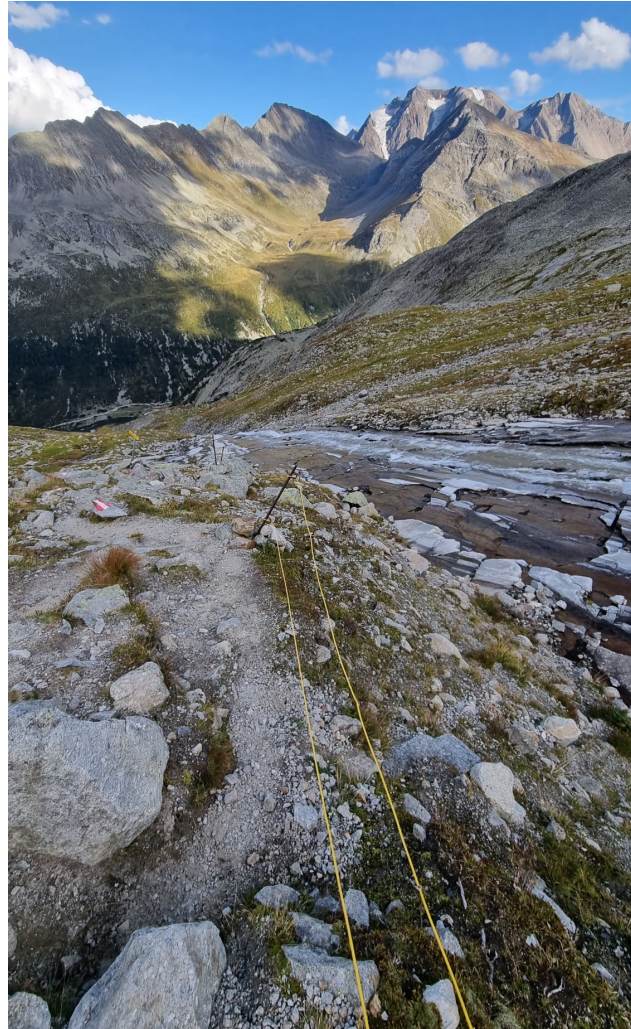

Measurement accuracy of GPS sports watches: The data recorded by GPS sports watches differs from the digital elevation model due to shading and the low GPS accuracy of the watches, resulting in deviations in the elevation data (5-10%).

Furthermore, the data used by the measuring office is transformed into .shp, processed and then transformed back as .gpx and .kml.

In addition, the route of the Z101 is located in between two meridian strips. (M28 and M31 , creating a slight distortion).

KEY SECTIONS

- Oberschrammkar river crossing

WATER & FOOD OUTSIDE THE FOOD STATIONS

- The natural drinking water from the streams along the route is drinkable. Please use your common sense here.
- If you pass an open hut, you can always order something and pay for it yourself. However, some huts are closed at night and are not open for regular business. At night, you will therefore have to rely solely on your own food and the food at the food stations.
- Special arrangements have been made with the Berliner, Greizer and Kasseler Hütte. They are prepared for runners to come from 05:30 am to order something to eat.

HÜTTEN VOUCHER

- Each athlete will receive a voucher worth 15€ + a drink at the race number distribution, which can be redeemed at the described huts (Berliner, Greizer, Kasseler and Edel Hütte).
- Everything beyond the 15€ and 1 drink has to be paid by yourself, so feel free to take enough cash with you.
